WHY WINTECH:

Family owned and operated, their focus on high-quality materials and advanced engineering translates to products that deliver superior energy efficiency, contributing to significant cost savings and enhanced comfort. A broad range of customization options ensures design versatility, allowing clients to achieve their desired aesthetic. Furthermore, the company's commitment to professional installation and comprehensive warranties provides clients with confidence and long-term value. In summary, Window Tech Systems delivers a complete solution encompassing quality, performance, and peace of mind.

KEY PRODUCTS:

To meet increasingly stringent energy codes WinTech expanded their product line from exclusively aluminum windows to include Unplasticized Polyvinyl Chloride (UPVC) options. Aluminum windows and doors often struggle to achieve the required energy performance levels, making UPVC a compelling solution. UPVC windows are particularly well-suited for both new construction and renovation projects, especially in multi-family housing.
